DETAILED ACTION

This Office Action is in response to an amendment filed 26 November 2007 in which claim 1 was amended and claims 1-16 are pending.

Allowable Subject Matter

1. Claims 1-16 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Claims 1-16 are allowable over the prior art for at least the reason that the prior art fails to teach and/or suggest a reflected-type microscope including "the lens having a pupil plane and being disposed in a detection beam path" and "imaging optics disposed along the illumination beam path and having a corresponding plane which optically corresponds to the pupil plane of the lens by being a Fourier plane of the focal plane of the lens" as set forth in the claimed combination.

Maeda et al., US 2002/0154303 A1, disclose a reflective-type microscope (fig. 1) comprising: a light source (4) serving to generate an illumination light beam that can be directed through a lens (9) along an illumination beam path (fig. 1) and onto a sample (1), the lens having a pupil plane (10a); imaging optics (13) having a corresponding plane (10b) which optically corresponds with the pupil plane (10a) of the lens by being a Fourier plane of the focal plane of the lens (page 4, section [0055]); and at least one attenuation element (38) disposed in the corresponding plane (10b) of the imaging optics (13) along the illumination beam path (fig. 1), the attenuation element (59) comprising structure elements and reducing an illumination light power over an entire cross-section of the illumination light beam by means of the structure elements but does not have imaging optics disposed along the illumination beam path as claimed.

Nihoshi et al., US 200/0227674 A1, , disclose a reflective-type microscope (fig. 1) comprising: a light source (11) serving to generate an illumination light beam that can be directed through a lens (21) along an illumination beam path (fig. 1) and onto a sample (20), the lens having a pupil plane (21a); and at least one attenuation element (14 or 15) disposed in the corresponding plane (see at least the abstract) along the illumination beam path (fig. 1) but does not have imaging optics having a corresponding plane which optically corresponds with the pupil plane of the lens by being a Fourier plane of the focal plane of the lens as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”

Response to Amendment

3. It is noted by the Examiner that the drawing and specification objections and the 112 rejections made in the previous Office Action have been withdrawn due to amendment by the Applicant.
